Profile

I worked as an architect and BIM Manager (Building Information Model) in the UK for 5 years. I was in charge of coordinating the way we use software across the practice. I developed plug-ins and scripts that improved the efficiency of my colleagues and by doing so I discovered my passion for technology.

I have experience with:

- Working in large and complex projects and teams.
- Dealing with demanding deadlines and clients.
- Leading a team and being responsible for parts of a project.
- Communicating with consultants and clients and understanding their point of view.

Projects

Portfolio Website

NextJS, React, Tailwind

Card Game

Java, LibGDX

2D game based on the Greek card game Biriba.

Allure Rent a Car Website

NextJS, React, Tailwind

A real life project for a car rental company in Cyprus.
