🪪 Profile

I worked as an architect and BIM Manager (Building Information Model) in the UK for 5 years. I was in charge of coordinating the way we use software across the practice. I developed plug-ins and scripts that improved the efficiency of my colleagues and by doing so I discovered my passion for technology.
I have experience with:

- Working in large and complex projects and teams.
- Dealing with demanding deadlines and clients.
- Leading a team and being responsible for parts of a project.
- Communicating with w wide range of professionals and understanding their point of view.

{ } Projects

Portfolio Website ↗
NextJS, React, Tailwind

Taxi application ↗
Java, JavaFX, SQLite
Software used by a taxi company for management of rides, drivers, clients and fleet with automated invoices.

Allure Rent a Car Website ↗
NextJS, React, Tailwind
A real life project for a car rental company in Cyprus.

Card Game ↗
Java, JavaFX
My first attempt to built this was with Python, my aim was to experiment with OPP concepts. This version is the Java implementation.

Attractor ↗
Python, Matplotlib
Developed for a mathematician to help her research. Calculates and plots various functions.

📚 Courses

CS50 Introduction to Computer Science
Harvard - Onlne

CS61A Structure and Interpretation of Computer Programs
Berkeley - Online

CS61B Data structures
Berkeley - Online

🎓 Education

MArch Architecture
Welsh School of Architecture
Cardiff, Wales

BA Architcture
University of Portsmouth
Portsmouth, UK

Architecture and ivil Engineering
Università degli Studi Di Firenze
Florence, Italy

🧠 Skills

Java	JavaFX	Python
Javascript	CSS	React
Node.js	C/cpp	SQL
